CLEANING AND MAINTENANCE - ROTOMOLDED PRODUCTS

Rotomolded products are manufactured from polyethylene which offers resistance to soil and long service if properly maintained. Most spills can be cleaned with a damp cloth or a water rinse, however, stubborn soils will require the use of commercial cleaning products.

In all cases, regular cleaning and thorough rinsing will extend the service life and maintain the product appearance.

HAND CLEANING OPERATIONS

A mild detergent applied with a cloth or sponge will effectively deal with normal accumulations of soil.

1. Prepare cleaning solutions according to instructions provided by the detergent manufacturer.
2. Wash surfaces with a wet applicator and thoroughly rinse from top to bottom.
3. Wipe dry to minimize spotting.

Multi-purpose foam cleaners are available which provide both cleaning and disinfecting capability. Consult product label for specific information regarding use.

REMOVAL OF HEAVY SOIL OR STAINS

Use of an all-purpose cleaner along with a soft brush will remove heavy soil and caked-on foods.

1. Saturate the affected area with cleanser and brush in a circular motion.
2. Rinse thoroughly and repeat if necessary.

NEVER USE ABRASIVE DETERGENTS OR SCOURING POWDERS ON PLASTIC SURFACES.
